# ACELOCK
# SMART LOCKS

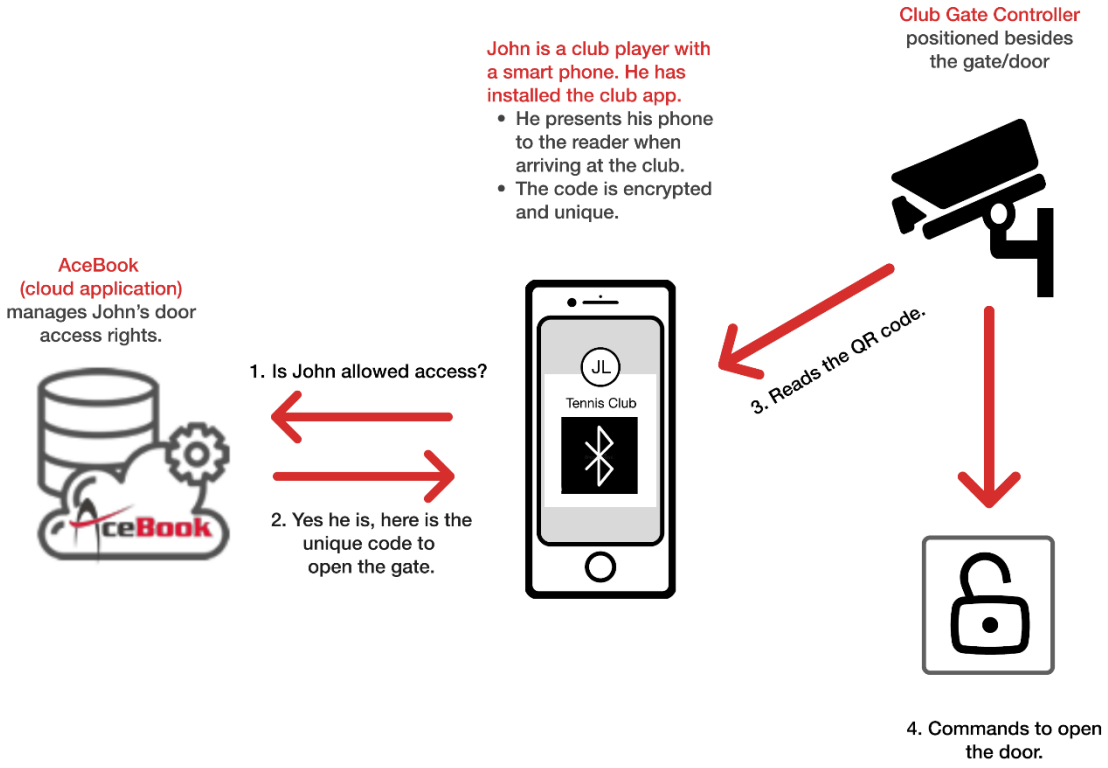
# ACELOCK SMART LOCKS

This smart technology uses mobile phones with the AceBook app to control gates/doors access. Individual access permissions are managed on AceBook. Access codes are encrypted and codes are unique for maximum security.

**Simple**
No key, keypad, fob or card to manage and distribute.

**Reliable**
Industrial grade, 30 years experience in building management.

**Peace of Mind**
Allowing individual access is at a push of a button from your sitting room.



Smart Locks were specifically designed to simplify the management of access to your facilities.
- No more organising new sets of keys, fobs or cards for new members.
- No more chasing people for keys, fobs or cards when they no longer have access.

To gain access, people will download the AceBook app on their smart phone, login to AceBook through the app, open the app onsite, present the phone and let the Smart Lock do the rest.

# SECURE ACCESS REIMAGINED

Transform Your Facility Security with Intelligent Access Control

## THE CHALLENGE YOU FACE EVERY DAY

Physical keys are costing you more than you realise:

- Administrative burden of key management across multiple facilities
- Security breaches when keys are lost or employees leave
- Zero visibility into who accessed what, when
- Inability to respond quickly to security incidents
- Recurring costs for lock changes and key replacements

## YOUR INTELLIGENT SOLUTION

Two Powerful Components Working Together:

 Mobile Access App

- Secure smartphone-based entry
- Encrypted digital credentials
- Works offline during network outages
- Intuitive one-tap access

 Cloud Management Portal

- Real-time access control from anywhere
- Instant user provisioning and deactivation
- Comprehensive audit trails and reporting
- Automated access scheduling

Step-by-Step Process:

- Administrator grants access via secure cloud portal
- User receives secure digital credential on mobile device
- Smart reader authenticates user via encrypted communication
- Door unlocks and activity is logged automatically
- Real-time reporting provides complete audit trail

## QUANTIFIABLE BENEFITS FOR YOUR ORGANISATION

 Enhanced Security & Risk Management

- Instant Access Revocation: Eliminate security windows when users leave
- No Lost Key Vulnerabilities: Digital credentials can't be duplicated
- Complete Audit Trail: Know exactly who accessed what facility and when
- Reduced Insurance Risk: Demonstrate proper asset protection protocols

 Measurable Cost Savings

- Eliminate Lock Changes: No more €150-300 per lock when keys go missing
- Lower Administrative Overhead: Automated user management saves hours weekly
- ROI Typically Achieved: Within 24-36 months through operational savings

 Operational Excellence

- Instant Scalability: Add new users or facilities in minutes, not days
- Emergency Response Ready: Rapidly modify access during critical situations
- Centralized Control: Manage multiple locations from single dashboard
- Integration Ready: Compatible with existing security and HR systems

 Compliance & Reporting

- Automated Documentation: Detailed access logs for audits and investigations
- Regulatory Compliance: Meet accountability requirements
- Insurance Documentation: Comprehensive records for claims processing
- Performance Analytics: Optimize facility usage and security protocols

## BUILT FOR RELIABILITY

- AES 256-Bit Encryption - Government-grade security standards
- 24/7 Technical Support - Dedicated support team

## IMPLEMENTATION MADE SIMPLE

Phase 1: Assessment & Planning

- Site survey and requirements analysis
- Integration planning with existing systems
- Staff training program development

Phase 2: Installation & Testing

- Hardware installation with minimal disruption
- System configuration and testing
- User enrolment

Phase 3: Go-Live & Support

- Full system activation
- Ongoing monitoring and optimization
- Continuous staff support and training

## ABOUT ACEBOOK SOLUTIONS

Across the country, over 50 organisations already trust AceBook Solutions to safeguard what matters most. At AceBook, we specialize in intelligent access control systems built specifically for facilities, utilities, and critical infrastructure.

What sets us apart is simple: affordable enterprise-level security made easy to use. Our technology doesn't just protect your assets, it streamlines operations and lowers costs at the same time.

And here's something we're especially proud of: our solutions are patented, developed, and manufactured right here in Donegal. AceBook is more than just a product, it's part of a complete suite of services designed to give you the confidence and control you need to operate securely and efficiently.

We'd love to show you how AceBook can make a measurable difference.
